

August 20, 2024

Dear Alliant Energy Customer,

InterCon Construction, Inc is scheduled to begin a construction project in the River of Lakes area of Bagley Wisconsin on behalf of Alliant Energy after Labor Day pending weather and construction crew availability. This is part of Alliant's continuing effort to ensure the essential service of a safe and reliable electric system.

Please notify our crews when they are in your area of your private underground facilities. If you are unable to meet with our crews, please mark any customer-owned underground facilities with stakes or flags if possible. This includes, but is not limited to: customer-owned underground electric, LP lines, septic/sewer lines, underground irrigation systems, dog fences, etc. This helps to ensure we will not damage your facilities.

If during our previous conversations about this project you were interested in having your overhead electric service buried at no cost (which includes you paying to have your meter upgraded by an electrician) please, let me know who your electrician will be for this work. The Alliant Lineman can coordinate their efforts directly with your electrician at the time of activating the new cables installed as part of this project. Requests by email are preferred, using your address as the subject line. My email address is listed below as well as my phone number if you have any questions.

If Alliant would need to interrupt your service, they will attempt to notify you in advance by phone or door hanger. To confirm or update your contact information, visit alliantenergy.com/myaccount or call 1-800-255-4268.

Our crews will be upgrading the cables and equipment in the easement or right-of-way area. These areas will potentially be disturbed during construction. After the project is completed, we will restore the disturbed ground back to normal conditions as ground/weather conditions permit. We appreciate your cooperation as we move forward with this project. You can call us at 608.422.1102 if you have any questions.

Sincerely,

Sid Ballweg
